

Introduction:

The Tecum Optical fTTX Box is a wall mountable compact box designed to terminate up to 4 fibers at the end user interface. This product provide fiber management to ensure long term reliability and the transmission of high speed services.

Tecum 4-port Box uses the industry standard SC or LC connector interface. Suitable for both direct termination and fusion splicing, the unit includes mini splice tray to accommodate the splice protectors. The capacity may be doubled by incorporating LC duplex adapters with the fibers directly terminated.

Features & Advantages:

- Compact and easy to install
- Indoor wall mountable
- Appropriate for LC, SC connectors.
- 4 ports.
- Flame retardant ABS material
- Operating temperature -40° C to +80° C
- Comply with UL94
- Cable management thickness: 0.9mm

Applications:

- Utilized in FTTH applications
- Telecommunication Networks
- Data correspondences Networks
- Local Area Networks
