

Introduction:

Made for tailored connectors, the Tecum snap-in type UTP keystone patch panel can be customized to the installer's desired design needs. Compliant with category 6 keystone jacks, it is manufactured as an unloaded panel and created with a high grade of plastic and metal for top level durability. A holistic and inbuilt rear cable management cable routing function provides strain relief and can be mounted with ease at the back of the panel. Accompanied by an integrated label identification slot, and conforming to TIA 606, the patch panel lets the installer create project labels based on their custom requirements.

Features:

19" Modular Keystone

- Modular panel
- Window style label strips with port numbers
- Integral rear plastic cable management
- Suitable for category 6/ 6A UTP & STP keystone snap-in jacks
- Front Mounting: UL94V-0
- Metal housing: 1.5 mm thick steel

Applications:

- 19" racks and cabinets standard
- For UTP keystone jacks
- Height: 1U (24 ports), 2U (48 ports)

Standards:

- TIA/EIA-568-C.2
- ISO/IEC 11801:2011 (Ed.2.2) Class D/E
- CENELEC EN 50173-1:2011
- UL 94 V-0
